---

## Summary

A highly skilled Full Stack Developer with experience in designing and developing web applications using the latest technologies. Proficient in both **front-end (React)** and **back-end (Php,Laravel)** development, with a deep understanding of modern frameworks and best practices. Passionate about problem-solving, optimizing application performance, and delivering innovative solutions that enhance user experience. Capable of working both independently and within a team, with a strong commitment to quality and efficiency in project delivery.

---

## Education

Bachelor's, Computer Science, University of Jordan

OCT2020– AUG2024

The study like algorithms and computation theory, and applied fields, such as hardware and software design. Algorithms and data structure are core elements and solvable problem classes, The graduation project “Decoding Nature’s Secrets”, is a weather website that earned an A grade.

Diploma, Network and Information Security, Zarqa University College

SEP2017– JUN2019

Network security protects a network’s data and integrity using hardware and software to prevent threats. It focuses on securing data in transit, while information security safeguards data regardless of location.

---

## Experience

Full Stack Development Intern, *AppTrainers*

DEC2024 – JUN2025

Gained hands-on experience in Full Stack Development using Laravel & PHP for backend development, along with front-end technologies. Worked with the MVC architecture to develop and optimize web applications, enhancing problem-solving and debugging skills. As part of the training, I developed a **TODO** project that allows users to **add, delete, edit, and mark tasks as completed**. This project strengthened my understanding of CRUD operations, user interface design, and backend logic implementation.

## Courses

Front-End

MAY2023 – SEP2023

It is one of the most important courses available to learn modern web application development. This course aims to provide you with the knowledge and skills to build dynamic and robust user interfaces using the React framework. The course begins with introducing and understanding its philosophy and benefits in developing web applications. You will also learn how to set up your own working environment and install it on you.

## Skills

- Code Review
  - User Interface Design
  - Web Development
  - JavaScript (ES6+)
  - HTML5
  - Cascading Style Sheets (CSS)
  - React.js
  - Problem-solving
  - GitHub
  - Git
  - Version Control
  - Bootstrtap
  - Api testing
  - Reporting
  - Redux or Context API
  - PHP
  - Laravel
  - MVC
  - SCRUM & JIRA
  - Apache
  - MySQL
  - Relational database
- 

## Language

- Arabic
- English
